Abstract

The Pakistan constitution mentions that all citizens are equal and there should not be any kind of discrimination basis on sexual category, thus the fundamental rights of women are be assured, and carefully planned peoples identical in all respects. The endeavor of research is to find out main reasons about low education, deprived of socioeconomic state of affairs, societal tendency, culture, religion manipulate and in decision making contributions which have shown the way to gender discrimination in Turbat city of district Kech, Balochistan. The Gender inequality is uncontrolled in Baluchistan and girls are not supposed to go school and pursue higher education, everything is controlled by man their societal interaction, deprived of good health care and social activities. The strict customs and norms, Illiteracy, patriarchal culture and authority of sacred individuality could be the main reason discrimination of gender in Turbat. Favoritism is everywhere and nearby every part of stages of life and along with many characterizes of living style; nevertheless, it varies with categorizes of educational background of the respondents. This study explored a variety of concerns of feminine faced on a daily basis existence in education, healthiness, social dealings and taking of decision in content of sex discrimination. This study has also highlighted the existing law and polices for women empowerment and its implementation. There is also core need of consideration of impact of gender injustice, inequality and bias attitude towards the female gender and the researcher will also analyze it on social context of Baluchistan. Another important factor that leads towards discrimination is the existence of cultural and religious taboos. All the above mentioned and multiple other reasons are of great importance and need consideration on priority bases including the judiciary, that be able to play an essential responsibility in achieving gender justice equality by implementing the provisions protected of Pakistan constitution in the constitution for protecting the women rights.

Keywords: Gender, Discrimination, education, Turbat, Baochistan

Introduction

Gender and Sex, two terms which use of distinguish among two notions which was give emphasis to the dissimilarity amid social and biological sex , sexual characteristics is noticeable several stage of an individual lives and there are a lot of causes as a phase of their own qualities at any level , form of verbal communication ,metaphor , grouping at the public

level as a theory for association and gender is a classification principle that often resulted in two classes, the term gender is that classify an aspect all of human life.

Penguin dictionary of sociology defined Gender as “Gender is in a social context construct observable fact which is interrelated to or resolute by biology. The Gender inequality is using further words, gender

discrimination which indicates to inequitable rights concerning male and female based on different gender roles which lead to not the same behavior in life. The inequality of gender as term which widely has been recognized an individual narration. (Benazir et al,2021)

Gender refers to the role and social status of dissimilarities among both gender male and female in a society. This determined the roles through the socio-cultural along with socio-economic associations of general extensive of religion, ethical, permitted social norms and values. The word Sex is Biological term whereas Gender is a Psychological and a socially constructed one. ((Benazir et al,2021a)

The inequality of Gender is communal dilemma which root cases is unjust treatment in societal among Genders. The unlikeness is notable from biological dynamic this misperception come up to initially from incorrect sympathetic concerning the Gender spots herein existence. Currently an irony which feels female to endure hardship and situate the ladies hooked on objectionable circumstances have been presents in each field of living. Nevertheless, Discrimination against Gender is change from that in others. (Evans,2017).

The words gender inequality or Gender discrimination mention as unjust words rights among boys and girls and base on unrelated sex dependability and responsibilities that show the way to inequality in time. The word Gender discrimination has been broadly identified in the history of human even though not pending the beginning of the 20th century. The renovation of related gender issues has been converted into one of the most speedy, insightful societal changes (Essay UK, 2013)

This research is based on Gender discrimination in education, this essential to understand the significance of education and the impact of Gender and sex consciousness. The term Gender plus the appearance of Gender is the faith, the long-established, the culture and society values are given importance to civilization and collective life (Holmes, 2008)

Anthropologists and historians have developed wide-ranging analysis of gender and labor that document a

sexual division of work as a common feature of a human societies in the sense that at least some tasks are typically reserved for either man and women biologically or psychological difference between the sexes ultimately supply little to the enlightenment of the division of labor, for man in society might be the province of women in another or vice versa. (R.A. Robert, 2005)

Gender is found everywhere and the Gender impact is an important for Gender awareness is way to understand the perspective of Gender roles and behavior which influence both Gender in comparison of need. (Alizai, Shahida et al,2021)

The Gender discrimination is the initiative that boys and girl could not be not the similar. That's universal with primary notion which is low economic power is considered more. According to research conducted in 2009 that the literacy rate of female in Pakistan was up to 38% in 2006-07. (Alizai, Shahida et al,2021a)

Gender inequality is major obstacles for the well-being of human. The worst effects that are faced by girls which could be the foremost foundation of disparity while women are being discriminated in each field of life that are consist of healthiness, schooling, democracy demonstration and the contribution of economic opportunity, informative accomplishment, moreover wellbeing with endurance, the empowerment of politicians. The state of affairs of Pakistani educated girls is amid the smallest on the planets. The ratio of literacy for urban is much greater than 5 times than the rates of rural area of girls. However, rate of the literacy is rate is unmoving lesser for girls as match up to boys. (Chaudhry,2009).

The education for female is extremely significant and in self grooming, behavior and for mental and physical health of an individual determining personality of women. Unluckily, the world still doesn't have get the proper time and resources for female education in this part of Pakistan (Baluchistan) and at slightest urbanized province Baluchistan is thumbs downed exception. Some certain issues are associated to right of entry, lack of mandatory educational conveniences, sympathetic environment and limitations imposed by civilizing values. (Alizai, Shahida et al,2021b)

Baluchistan is occupying approximately 43% of Pakistan land region and the largest province of and is approximately the land size of Baluchistan is same size of France. Baluchistan also has smaller population as compare rest of other Pakistan and only regarding 5% of the population living there While 80% of Baluchistan population living in tiny villages. The villages comprise mostly safe and sound in these modern times and for the most part without being seen and unnoticed by the authorities. There are only a small number of resources which are not available unluckily in those areas and education lacking of fund which effect the education of girls. The Baluchistan presented the status of girl's education in countryside of Baluchistan discouraging image of it. The rate of Illiteracy in entire Pakistan 80% and on the increase, the literacy rate between rural female in Baluchistan is miserable. In Baluchistan it is approximately that a smaller amount than 2% of countryside girls in Baluchistan is educated. (Naz,2003). The Education level of feminine in Baluchistan is tremendously deprived and so low. Girls are lack of confidents and losing hope due to the shortage of education establishment in Baluchistan.(Alizai, Shahida, et al., 2021c)

Extremely there are only a small number of schools, colleges, and universities in Balochistan and for girls is fewer schools and girls in rural area don't go to school regularly. In Baluchistan Mekran Division is the biggest division, mostly girls and women passing their whole life for doing household chores for the reason that there are some girls who experience basic education, several elderly Baloch and narrow-minded considered with the intention of womanly education will damage the reputation of their social group. Excluding that's the most awful discrimination for feminine stay at home and spends her world at home. Generally, the parents of nearly everyone Baloch are unqualified and Cultural and they are unaware the importance of education. (Siraj, Bashir and Huma Zafar,2017)

Gender inequality is central concern in Pakistan, the major purpose of gender inequality is too aware the discrimination involving both Genders. The consequences display those views of frequently citizens is like that, a girl faces inequality through her life time's decision and her career as well. These

practices are experimental in the rural areas. The reasons are numerous and but generally it could be social, political & male dominant perspectives.

The Research Problem

In study of Gender the word "Gender "is use in the direction of present to the collective also civilizing structure of being man /women, should not to shape man or else feminine in its whole. Simone de Beauvoir (philosopher) believed: "Nobody is given birth and need to be woman; individual turn out to be one (Balongon,2010).

Gender refers to generally bring together tasks and odd jobs of men and women of the world. The different position and everyday jobs are there of female and male in each society. The conception of Gender discrimination included expectation as regards characteristic, approach and behaviors of Human being and how they equally distributed resources among them; the term Inequality of Gender is so ordinary in third world which have access to resources. (Shauka, Siddiquah, & Pell, 2014).The Gender inequity defined disparity in situations amongst man plus women to take pleasure in all the rights of human being. Gender is social stratification and the marker of economic and as a result of exclusion regardless of one's socio-economics class.

In province of Baluchistan man supremacy is moderately well-built also the domination of female. In Baluchistan capital city women are facing educational problems and disparity their women are underprivileged for essential rights in many fields of existence and specially going for institutional study as well. The gender discrimination is the bases of the strict culture and firm custom of Baluchistan which try to keeps the women in hajib and covered up plus unaware of her rights. Lack of confidence, lack of education and misconception values of Islam are other causes at the back injustices and bigotry resources too, but it has also the lowest literacy rates as well. Shortages of education, underprivileged quality poor improvement has affected every aspect of people's lives and its strong influence on people's way of thinking is apparent through the behavior in which women are indulgence.

Normally speaking, the Gender inequality has been presented for a long-lasting time and in each region on the earth, although in Baluchistan no issue where it is. At the moment the humanity collectively makes this outdated beginning pass away. (Siraj, Bashir and Huma Zafar,2017a) Without female education and gender equality is not possible to accomplish victory, development and progress of any country around the worldwide. Education must be provided and free for girls and there should be equally opportunities whether educational or professional as men. Educating girls is high productivity in the world developing countries. It is the best savings of several nations. Consequently, this is so essential for women to be made available education for them. (World Bank, 2011).

The Research Objectives

- To find out the Gender discrimination in education.
- To find out the social behavior toward discrimination of girls.
- To find out the role of judiciary in achieving gender justice and gender equality by implementing the provisions enshrined in The Constitution of Pakistan 1973 for protecting the rights of the women.
- To find out the reason of discrimination against girls' higher education in Kech.
- To find out the reason of gender discrimination in Baluchistan.

Hypothesis 1

- The discrimination against girls in education effect on them socially and psychologically.

Hypothesis 2

- The Gender discrimination caused due to lack of Islamic knowledge and Education.

REVIEW OF LITERATURE

Gender Discrimination

Gender discrimination is worldwide issues, Gender unfairness is an imbalanced behavior, together with dispensation and the main concern on the base of Gender. The inequality of on the foundation of their

sexual characteristics / Gender shouldn't be their identity and not be mentioned and prioritize in excesses of another. (Bashir, Siraj.'2019) Pakistan is in the midst of those state, where culturally, an inferior a social status is attached with women and female have vulnerable role in society, because of this discouraging situation, women have suffering from discrimination in different aspects of life. (Shahyar,2018).

Gender discrimination is a primary right of human being and that right is dishonored by gender-based discrimination. Femininity inequality starts in childhood and is still warning the potential of children the lifetime around the globe – excessively distressing girls.² Gender accurately defined Kind (Latin genus) and it initially it was a linguistic term. The alternates use of Sex dates 1955 and at date time the educational distinction among Gender as the societal positions for man and women against. Sex as the biological dissimilarity between males and female previous to next it was hardly used of linguistics externally. (C. Harper,1979)

Gender inequality is uninvited it is unpleasant possibly will be offensive for emotional and to a sensible to a person and it effect on mental health actually is offensive complaining about c physical or verbal act which is conducted probably sexual harassment even if it was not intended to be nasty.

Woman Educations

It is a fact girl mature due circumstances at early age a huge acknowledged fact that girls mature at and far younger age than boys, that may perhaps cause them being capable of follow their know-how and capabilities faster; as a consequence, permitting them to develop a sustainable livelihood and get away poverty at a much in advance level in existence. No longer best does those benefit the character but her family, nearby community and empower the greater society to gain extra.

The education defines as the procedure of the stem of conveying understanding, abilities and judgment between proper and incorrect". (Bashir, Siraj, et.al.,2021) Training is maximum crucial approach in this period to distinguish amongst human beings and flora and fauna. It doesn't most effective train us the

abilities, presenting information however also addresses that how we are able to live in society that's various. Education is important for each lady and men. However, girls training! This word would possibly supply a sense of education to girls however it absolutely method "education to a kingdom ", as it's far generally said: instructing a lady is like instructing the whole own family. (Bashir, Siraj.2019a).

Constitution of the Pakistan declared to the A-37, girl education is the number one proper of each woman civilian; however, gender inconsistencies nonetheless exist in the instructional sectors. Schooling plays very critical role in our lives however women schooling is earlier as being critical device of attaining properly self-appreciate. There are nonetheless some deprived regions where ladies are intended to live a domestic existence best, they are no longer allowed to get schooling has grown to be the subculture of some of the societies. (Bashir, Siraj.2019b). In few of the areas, women are allowed to get schooling but they have got confined options to pick and pursue their professional career. They don't recognize that other expert careers do exist for a woman beyond the medical profession and we lack the quota of woman seats for numerous jobs. Folks who don't realize the really worth of instructing a woman do go through plenty. Nowadays education is much more likely to have tiers however it consists of your ethics, norms, lifestyle, and performance as well.

The constitution of Pakistan, while conform to in 1973, enclosed a section beneath the non-enforceable "principles of nation policy that point out " the nation ought to ,eliminated illiteracy and provide unfastened and obligatory secondary schooling inside ,within viable length" In 2010 the 18th amendment brought article 25-A within the segment manipulate judicially enforceable "fundamental rights," which role that "The state shall provide unfastened and compulsory schooling to all children of the age of five to sixteen years in such manner as can be decided by way of law" . (Constitution of Islamic Republic of Pakistan, 1973)

Women Education in Pakistan

The authorities of Pakistan aren't furnished that children dwelling in poverty with the centers they need to examine, in keeping with a brand-new Human

Rights Watch (HRW) document. The majority of Millions of girl are in particular at chance, and HRW is calling at the authorities to step up for their futures. (Mehmood & Hussain, 2018). (HRW 2018) Pakistan is struggling again for many years with the gender inequality of women achieving a schooling inside. Pakistan is the 6th most populated state in the global, however with extra than 40% of girls never getting an education, the country has one of the lowest literacy charges at the continent. (Nizam, 2020)

While girls have the proper to access training in Pakistan, teaching in Pakistan confronted several boundaries that prevent them from getting schooling pursuing their dreams. (Barrech, sadia et al,2019). In a patriarchal society, girls discover it hard to get right of entry to schooling and different possibilities for the cause that of the placement a male-ruled culture in all in their lives. Impediment that masses of women face in Pakistan is loss of accessibility. Many girls residing in the rural areas of the country are not able to be present at academy due to the fact they cannot manage to pay for the value of delivery and transportation and for themselves or their kids. (Barrech, sadia et al,2019a)

Even though girls and women circulate violently to get right of entry to the training in Pakistan that they so desperately need, there are many corporations operating tirelessly to trade this unfortunate state of affairs (June eleven, 2018/by Borgen Project). (Asif,2018). The schooling System in Pakistan is in harsh conditions, with an absence of presidency conveniences creating "schooling barren region" for bad children, mainly girls, in keeping with a brand-new report via Human Rights Watch.

Girl Education in Balochistan

Baluchistan, Pakistan's biggest province, the representation is bleaker nevertheless 81% of girls did not attend basic primary education c in 2014 and 2015, as measure up to 52% of boys. In Baluchistan there is simplest infrequently any academic institutions in in which women can get clean get right of entry to training. As in keeping with a survey, literacy fee among ladies in Baluchistan is deplorable in Pakistan, with most effective 27 percentages of literate girls which is the lowest inside the complete international.

Women preserve an approaching popularity within the Baloch society, thus for them, dignity and respect are a crucial apprehension for Baloch parents. The conviction and enthusiasm of Baloch parents toward training is a fine which suggests that they do no longer move up towards female training. Therefore, a loss of establishments creates troubles within the province that may yield terrible impacts. (Siraj, Bashir and Huma Zafar,2017b)

Unluckily, encompassing 60-70% kids in Baluchistan didn't attend primary school and secondary age group is reported to be out of faculty. More girls than boys are out of faculty: seventy-eight and 63% in line with cent respectively. The human beings in Baluchistan are largely conventional. Women and ladies have constrained right to apply to basic schooling, fitness and different existence resources. That is compounded by using the quantity of girls that drop out of college in grades 4 and five - a time that marks the start of menstruation cycle for most of the girl (Anker,1998).

The strict lifestyle and traditions are different major individuals towards gender discrimination in Baloch society, Baloch daughter marry at their early a long time and male run circle of relatives and are taken into consideration superior than women, in tribal place of Baluchistan ladies aren't permit to anywhere and observed by means of a male member of their own family and lady allow to examine although they're not preference Subject. (Benazir et at,2021b)

The cause for the uninterrupted overlook public faculties have faced in Baluchistan is the chosen businesses, tribal and political leaders. All of us who can find the money for to accomplish that will ship their children to the provincial capital or different better region for schooling, far from the jail that public schools in Baluchistan have turn out to be. These ruins are reserved for the destitute population of Baluchistan. (Benazir et at,2021c)

Other purpose from the public schooling in Baluchistan is in along with absence of stud structure like path-books and different infrastructural requirements. The heartbreaking reality is that on account that maximum of the populace isn't properly-knowledgeable, they infrequently raise a voice in opposition of the system.

The position of girls consists of almost half of human capital; verify to show a huge contribution to development procedure. Girl's role inside the society improvement is extra similar to the aim of global socio-financial boom and development. girls' hassle has been centered for the remaining few a long time with the troubles of their equality with guys being considered as considered one of the blazing issues. (Siraj, Bashir and Huma Zafar,2017c)

Gender Inequality

Gender narrated to a hard and fast of cultural expectancies consistent with which men and women behave (Kruger, 1997). Gender dissimilarity to inequitable rights stuck between male and Women based totally on distinctive gender roles which pass in front to unequal management in existence.

Son choice is a form of gender based totally discrimination that is a properly-diagnosed fact that has be provided in all components of the sector. It is actually a depressing truth that during some countries, societies and groups the phenomenon is so sturdy that it has led to gender imbalance and women forget. (Arshad & Ahmed,2019).

near the beginning days of a baby girl is a condition of zealous notice to anthropologists, sociologist and Psychologists along with others, kids play a valuable position in maximum families and have rights protected by means of the country parents surrender a brilliant deal in their time and electricity to nurture their children and historian looking at attitude to and treatment of children in the beyond. (Mroczk,2015)

Gender dissimilarity in educational foundation has been experienced. Women had been discriminated towards in numerous components as positioned aspect through facet to their male equivalent. The prime element in phrases of gender inequality has been practiced is in participation. (Save the children,2001) The scholars are required to participate in number of regions in instructional establishments. (Bhattarai and Suvedi, 2006) Girls have been supplied with less participation opportunities in comparison to their male counterparts and hence, it led to occurrence of in gender inequality. In nation-state region, this problem has been more excessive as compared to urban groups.

Gender inequality in education is discovered as the predominant barrier within the usual development of the gadget of education. Therefore, it is essential to originate measures and applications which might be centered upon making provision of equal rights and possibilities to girls, no longer handiest within the course of fulfillment of education, however also in the implementation of other process duties.

Islam and Gender Equality

On the report of 2009 index international gender gap it can be discovered that “maximum middle East and North Africa area countries not best retain to perform a long way beneath the worldwide average, however additionally do not show tons development over the past year or have deteriorated with the exceptions of Israel, Bahrain, Algeria, Morocco, Egypt and Saudi Arabia, each of which has advanced in comparison with their absolute rankings in 2008.” furthermore, out of 134 international locations, the nations which were given the least standard gender index score are mostly from Muslin nations, with Yemen at the lowest (World Economic Forum 2009).

Gender Stereotyping

Gender stereotype are generalizations approximately the roles are normally neither Positive neither negative they are actually erroneous generalizations of the male nor lady attributes. Gender stereotypes are unsophisticated generalization approximately the gender attributes, variations and roles of individual and /or corporation. Many people prominent the chance of gender stereotyping, but preserve to make these types generalization. Gender stereotypes start the second one a baby gender is born.

Gender stereotypes are standardized and frequently sneering idea and image approximately a person on the thought of gender (Connell, 1995). Gender stereotypes play a huge position in socialization and gender role in educational field, the encircling of college and sophistication room, instructor and curriculum represents' Masculine ideology, the studies display how gender stereotypes evolved all through classroom and the coaching of publications. Gender stereotypes may be observed in each section of life in appearances and verbal exchange, triumph in every society from

culture to civilization. There are a few which exist and come to be stereotypes with period of instances, moreover that stereotypes are globally common and all member of society switch these from generation to technology, Stereotypes can be a discernment, a prejudice, a mind's eye and an impression as nicely. (Parvez & Khalid,2018)

The study of gender Stereotypes at a combination of height, of education show that gender stereotyped discovered in socialization company like own family and training. The study additionally located that gender stereotypes can effortlessly be discovered in nearly all magnificence room conditions. (Bashir, Siraj,2019)

Methodology

This research is consisting of quantitative research in which the content of Gender Discrimination in education in Baluchistan. The reason of research is to discover the causes of discrimination against girls' education in Baluchistan; Gender discrimination is inequality between genders, gender gap is everywhere women rights is human rights unluckily still gender inequality exists.

$$\frac{55 \times 60}{100} = 33$$

Is there gender gap in your institution	Discriminate in educate effort on girls education		Total
	Yes	No	
Yes	25(18)	20(27)	45
No	15(22)	40(33)	55
Total	35	60	100

$$\left(\frac{18-25}{18}\right)^2 + \left(\frac{27-20}{27}\right)^2 = 7.54$$

$$+\left(\frac{22-15}{22}\right)^2 + \left(\frac{3-40}{33}\right)^2$$

$$\left(\frac{-7}{18}\right)^2 + \left(\frac{-7}{27}\right)^2 +$$

$$\left(\frac{-7}{22}\right)^2 + \left(\frac{-7}{33}\right)^2$$

$$\frac{49}{18} + \frac{49}{27} + \frac{49}{32} + \frac{49}{33}$$

$$2.72 + 1.81 + 1.53 + 1.48$$

Conclusion

We give that the computed value x^2 7.54 is not less thur the $x^2 = 3.841$ therefore H_0 is rejected.

1: $H: \mu_1 = \mu_2$

(The gender discriminate cauded due to call of Islamic toward their culture

(Gender discriminate does not c.... due to call of Islamic ... towards their culture.

3. $a = 0.05$

4. Statistical Test

$$x^2 = \sum \left[\frac{fo - fe}{fe} \right]^2$$

Reject H0 if $x^2 \geq 3.841$

Computably of x^2

5. Dec... rule:

Step 1. The Contingency table

Gender gap in your institution	In is law women are most respected		Total
	Yes	No	
Yes	30	15	45
No	40	15	55
Total	70	30	100

Step 2. Compute the fe

$$\frac{45 \times 70}{100} = 13.5$$

$$\frac{45 \times 30}{100} = 13.5$$

$$\frac{55 \times 70}{100} = 38.5$$

$$\frac{55 \times 30}{100} = 16.5$$

Is there gender gap in your institution	In Islam women are most respected		Total
	Yes	No	
Yes	25	20	115
No	15	40	55
Total	40	60	100

Step 4. Give $\left(\frac{fo-fe}{fe}\right)^2$ of each cell of contingency table.

$$\left(\frac{14-30}{14}\right)^2 + \left(\frac{14-15}{14}\right)^2 + \left(\frac{39-40}{39}\right)^2 + \left(\frac{17-15}{17}\right)^2$$

$$\left(\frac{-16}{14}\right)^2 + \left(\frac{-1}{14}\right)^2 +$$

$$\left(\frac{-1}{39}\right)^2 + \left(\frac{2}{17}\right)^2$$

$$\frac{1}{14} + \frac{1}{14} + \frac{1}{39} + \frac{1}{17}$$

$$0.07 + 0.07 + 0.02 + 0.05$$

$$= 0.21$$

Step 5. Putting the value in format

$$x^2 = \sum \left(\frac{fo - fe}{fe} \right)^2$$

$$x^2 = 0.21$$

Conclusion:

We get the calculated value $x^2 = 0.21$ is less the $x^2 = 3.841$ therefore the H_0 is accepted.

Conclusions

The (UDHR) Universal Declaration of human rights and convention on international basis and elimination of all form of racial discrimination (CERD), committee on the abolition of all kinds of discriminations against women (CEDAW) and constitutions of all the self-governing state condemn inequity on the basis of masculinity and acknowledge the gender equality. many of trend's growths encouraged social activist and gave birth to nongovernmental organization (NGOs) to inculcate awareness against gender discrimination and to initiate and support discrimination shedding measures. As a result most of the countries of the world adopted affirmative discrimination: deliberately favoring the groups who have experienced pervasive discrimination for a long time. The Human Rights Watch interrogated 209 individuals for human rights report. Maximum of girls who never ever go to school and didn't attend the class and these remained not capable to continue their schooling and their families in all provinces of Pakistan including Baluchistan.

Gender equality is not only a primary human right, but essential base for a diplomatic, flourishing and sustainable planet. Unhappily, at the current time, 1 in 5 women and girls involving the ages of 15-49 have reported experiencing physical or sexual violence. The 49 countries are there which presently have no laws for the protection of women from domestic violence.

Recommendations

➤ The discrimination against girls' education is not as new things so parents should treats their children fairly and teacher should always treat

both gender equally although teach them how to live friendly in society.

- Discrimination in workplace is very common so the staff and the employees live and world happily and should respect each other efforts and encourage each individual equally, women and men's work equally so the female must be given equal pay and wages.
- The gender inequality is one of the world current issues and United Nation and human rights should take it seriously and try to implement rules and action on these issues and there should be equal resources for both genders and also for transgendered.
- The educational and women development agencies should take serious action about girls' education and promote Gender equality because in a friendly environment working is easy, Gender inequality leads to depression and anxiety which influence the mental health although could be causes of suicide and crimes.
- Nevertheless, early marriages are one of the main reasons for girls' discrimination, early marriages can destroy her physically and mentally, she couldn't get education neither work for it, having kids in such an early age is a hilarious way to keep her always from school and world.
- The discrimination against girls' education is not as new things so parents should treat their children fairly and teacher should always treat both genders equally although teach them how to live friendly in society.
- Discrimination in workplace is very common so the staff and the employees live and world happily and should respect each other efforts and encourage each individual equally, women and men's work equally so the female must be given equal pay and wages.
- The Gender inequality is one of the world current issues and United Nation and human rights should take it seriously and try to implement rules and action on these issues and there should be equal

resources for both genders and also for transgendered.

- Education is key to development so country like is already under-development should take serious action about girls' education because development is not possible without women, and educated mother can lead to developments and can bring positive changes toward future however socio-economic conditions can be improved through both gender efforts, work hard and contribution, nothing can be achieved without collaboration, determination and enthusiastic of both genders.
